

**WHERE
INNOVATION
MEETS
EXCELLENCE**

**The great differentiator
in business is when an
organization steps out
and creates value
from something
never tried before.**

- Kerry Baskins

OUR COMPANY

We are a leading supplier of high-quality industrial products for a wide range of applications. With over 20 years of experience in the industry, we have established ourselves as a trusted supplier for some of the largest companies in the world. Our company has a rich history of providing innovative and cost-effective piping solutions to our customers. Our commitment to quality, service, and innovation is what sets us apart from the competition.

OUR VALUES

VISION

Our vision is to be the leading player in industrial equipment solutions, providing reliable and innovative solutions to our customers while delivering exceptional value. We aim to achieve this by building lasting relationships with our clients and suppliers, fostering a culture of continuous improvement and investing in the latest technologies and best practices.

MISSION

Our mission is to provide high-quality industrial equipment solutions to our customers, enabling them to enhance their productivity, efficiency and profitability. We are dedicated to delivering outstanding value, service and expertise, tailored to the specific needs of each client.

OUR COMMITMENT

We are strongly committed to all the stakeholders of the ecosystem. We ensure your projects are delivered on time, on budget and the highest quality and this remains our commitment to our customers.

VALVE

BALL VALVE

Our ball valves are designed and manufactured to meet the highest standards of quality and performance, ensuring reliable and efficient operation in various applications. We offer ball valves in a range of materials, including carbon steel, stainless steel, and exotic alloys, to meet the specific needs of your application. Designs include side entry, top entry, 1, 2 & 3 piece ball valves and special categories such as a v-notch and c-type ball valves.

GATE VALVE

Our gate valves are designed and manufactured to meet the highest standards of quality and performance, ensuring reliable and efficient operation in various applications. We offer gate valves in a range of materials, including carbon steel, stainless steel, and exotic alloys, to meet the specific needs of your application. Designs include API, DIN and AWWA, rising and non-rising stems and lined gate valves.

GLOBE VALVE

Our globe valves are designed and manufactured to meet the highest standards of quality and performance, ensuring reliable and efficient operation in various applications. We offer globe valves in a range of materials, including carbon steel, stainless steel, and exotic alloys, to meet the specific needs of your application. Designs include API, BS, DIN etc.

CHECK VALVE

Our check valves are designed and manufactured to meet the highest standards of quality and performance, ensuring reliable and efficient operation in various applications. We offer check valves in a range of materials, including carbon steel, stainless steel, and exotic alloys, to meet the specific needs of your application. We provide check valves to all standards and designs including, swing, piston, ball, tilting disc, nozzle, dual plate etc.

CONTROL VALVE

We offer a wide range of control valves, including globe valves, butterfly valves, ball valves, and diaphragm valves, to name a few. Our valves are made of high-quality materials, such as stainless steel, carbon steel, and bronze, to ensure maximum durability and longevity. Our control valves are also highly customizable to meet the specific needs of your process. We offer a variety of options for actuation, including electric, pneumatic, and hydraulic, as well as a range of trim materials, end connections, and sizes.

BUTTERFLY VALVE

Our butterfly valves are constructed using only the highest-quality materials, ensuring exceptional durability and long-lasting performance in even the most demanding environments. We offer a range of valve sizes and materials to suit your specific needs, including stainless steel, carbon steel, and cast iron options. Our butterfly valves are designed for precision and reliability, with features such as low torque operation, leak-proof sealing, and easy maintenance. They are suitable for use in a variety of industries, including chemical, food and beverage, pharmaceutical, and wastewater treatment. Our range includes centerline, double, triple offset and lined butterflies.

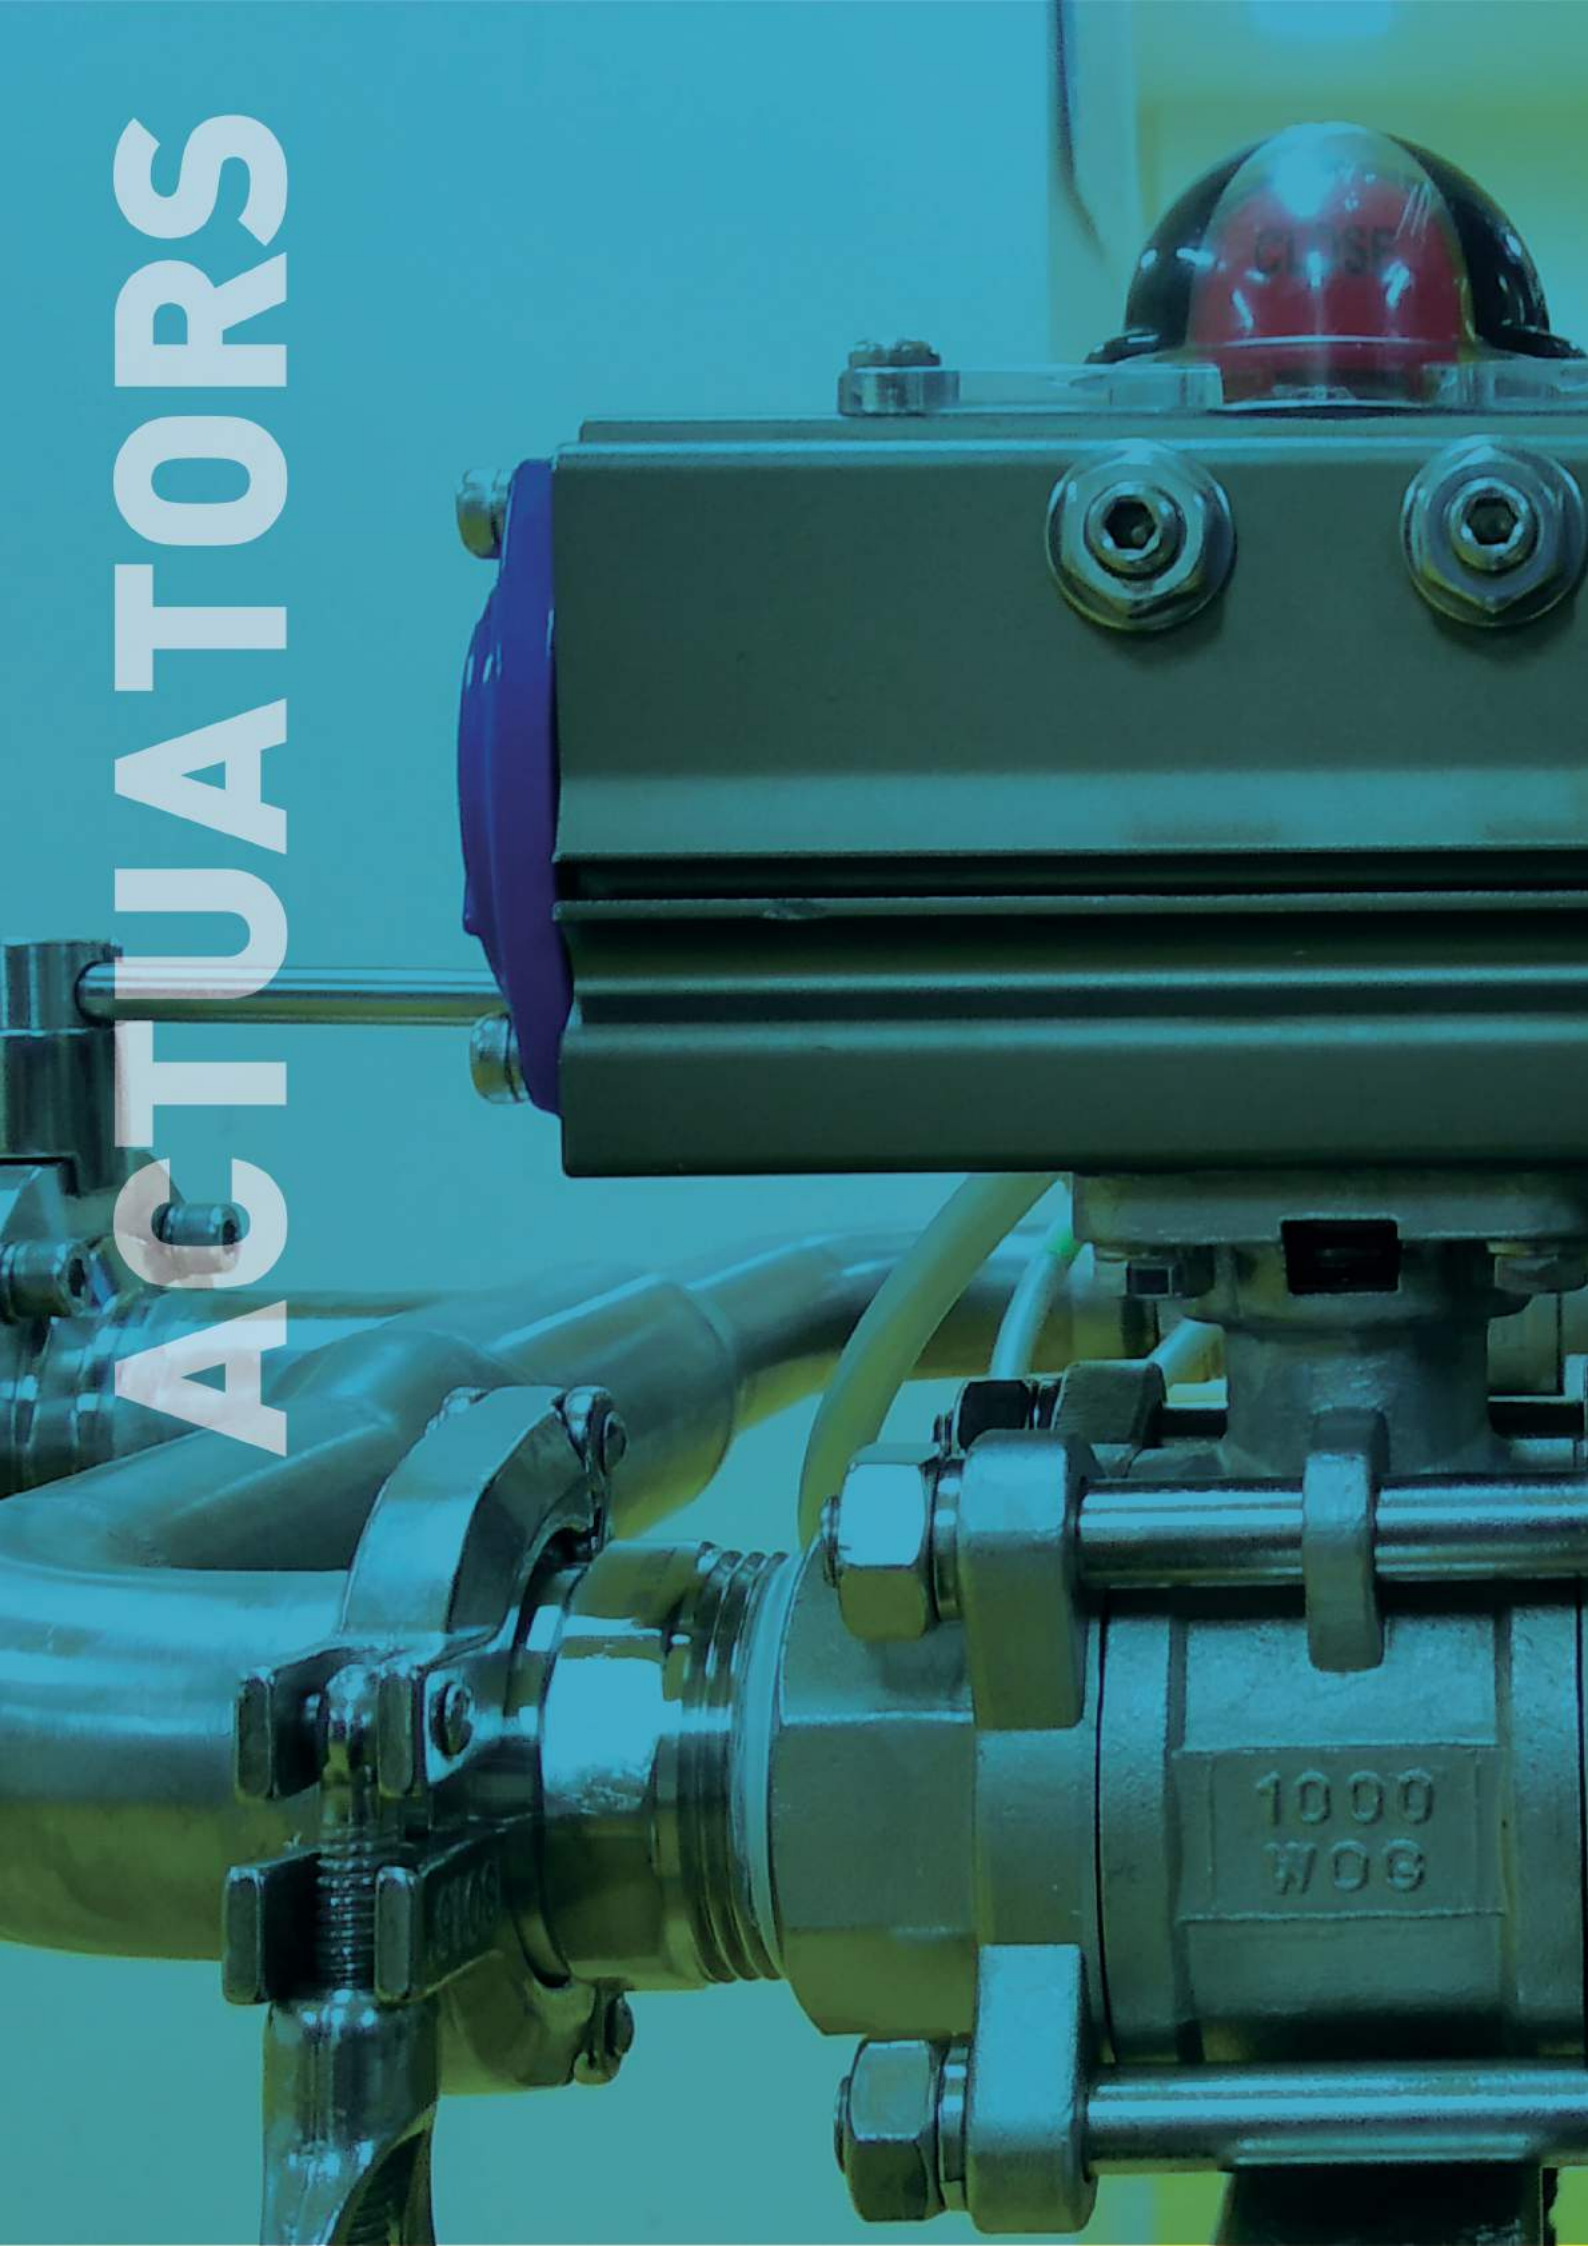

INSTRUMENTATION VALVE

We offer a comprehensive selection of instrumentation valves, including ball valves, needle valves, check valves, and manifold valves, designed to meet the demands of a wide range of industries, including oil and gas, chemical, pharmaceutical, and more.

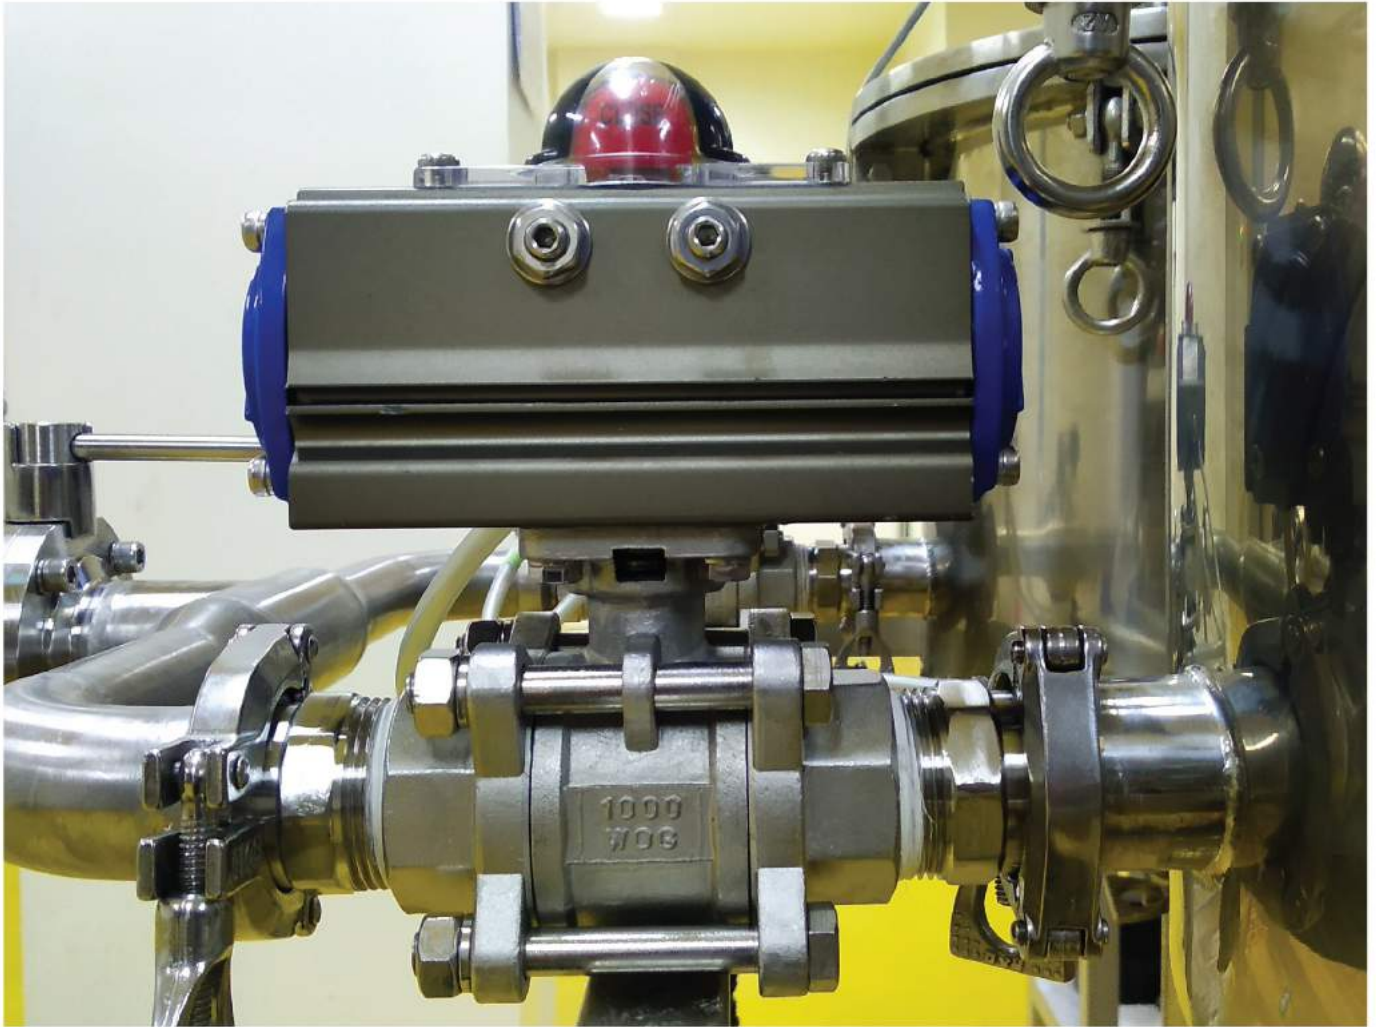

Our valves are available in a variety of sizes, materials, and pressure ratings to suit your specific needs.

ACTUATORS

1000
WOG

We offer a range of high-quality actuators that are built to withstand the demands of even the most challenging environments. Our actuators are available in a variety of types, including electric, hydraulic, and pneumatic, with a range of sizes and configurations to suit your specific needs.

Our electric actuators are designed for smooth, precise movement, and offer fast response times and accurate positioning. They are easy to install and operate and require minimal maintenance.

Our hydraulic and pneumatic actuators are rugged and durable, capable of delivering high force and torque in even the most extreme conditions.

All our actuators are engineered to meet the highest quality and safety standards, ensuring reliable and efficient operation for years to come. We offer a wide range of customization options, including stroke length, speed, and force, to ensure that our actuators meet your specific application requirements.

Our team of experienced professionals is available to provide expert advice and support throughout the selection, installation, and operation of your actuators.

We are committed to delivering outstanding value and service to our customers and are dedicated to helping you find the right solution for your unique needs.

PIPES & FITTINGS

FASTENERS

Our fasteners are manufactured from high-quality materials, including stainless steel, carbon steel, and alloy steel, to ensure maximum durability and strength. We offer a variety of fasteners including bolts, nuts, washers, screws, and anchors, all available in a range of sizes, finishes, and grades to meet your specific requirements. Whether you need standard or custom fasteners, our team of experts is here to help. We can provide advice and recommendations on the best fasteners for your particular application, and we offer custom manufacturing options to ensure that you get the exact product you need.

FLANGES

We offer a diverse selection of flanges to meet the needs of various industries, including oil and gas, chemical, petrochemical, power generation, and more.

Our flanges are made from the finest materials and manufactured to the highest standards, ensuring exceptional durability and reliability. Our range of flanges includes weld neck, slip-on, socket weld, threaded, blind, and lap joint flanges, among others. We also offer flanges in various sizes, pressure ratings, and materials to meet the specific requirements of your application.

GASKETS

We understand the critical role that gaskets play in ensuring the integrity and efficiency of your equipment, which is why we offer only high-quality gaskets that meet the highest industry standards. Our gaskets are made from a variety of materials, including rubber, silicone, PTFE, and graphite, and are designed to withstand extreme temperatures, pressures, and chemical exposure. Our gasket selection includes: Flange, Ring, Spiral Wound and Camprofile Gaskets. We also offer custom gasket solutions to meet your unique needs. Our team of experts is available to work with you to design and manufacture gaskets to your exact specifications, ensuring that you get the gasket solution that's right for your equipment and your business.

TEES

Our tee fittings are designed to provide reliable and efficient connections between pipes, hoses, and other components, and are available in a range of materials and sizes to meet your specific needs. We offer tee fittings in materials such as stainless steel, brass, and carbon steel, as well as in a variety of sizes and configurations, including male and female NPT, BSP, and JIC threads, and compression fittings. Our fittings are designed to withstand high-pressure and high-temperature applications, ensuring that your system operates safely and efficiently.

ELBOWS

Our industrial elbows are designed to provide seamless, efficient flow in a wide range of applications, from chemical processing to oil and gas production. Made from durable materials such as carbon steel, stainless steel, and alloy steel, our elbows are built to withstand high pressures, temperatures, and corrosive environments, ensuring long-lasting performance and minimal downtime.

We offer a wide range of elbow types, including short radius, long radius, reducing, and 3D elbows, as well as customized options to meet your specific requirements. Our elbows come in a range of sizes, schedules, and end types, including butt-weld, socket weld, and threaded, ensuring a perfect fit for your piping system.

PLATES

Our plates are made from top-grade materials, including steel, aluminum, and other alloys, to ensure exceptional durability and strength. They are available in a range of sizes, thicknesses, and finishes, and can be custom-fabricated to meet your specific requirements. We offer a variety of types of plates, including: Steel, Aluminium and Stainless Steel plates. We understand that every industrial application has unique requirements, which is why we offer a range of custom fabrication services. Our team of experts can help you design and fabricate plates to meet your specific needs, whether you need custom sizes, shapes, or finishes.

TUBING

Our steel tubing is manufactured to the highest standards to ensure durability, strength, and reliability in a variety of applications.

Our steel tubing products come in a range of shapes and sizes to meet the needs of any project. We offer round, square, and rectangular tubing, with a variety of wall thicknesses and lengths to choose from.

All of our steel tubing products are available in a range of finishes, including galvanized, black, and painted, to meet your specific needs. Our steel tubing products are commonly used in construction, manufacturing, and other industries that require high-quality, reliable tubing.

Our products are also ideal for use in structural applications, including bridges, buildings, and other infrastructure projects.

PIPES

Our wide range of pipes is designed to meet the needs of a variety of industries, from construction to manufacturing and beyond.

We offer a diverse selection of pipes in different sizes, materials, and specifications, to ensure that we can meet your specific needs.

Our pipes are made of high-quality materials that are durable, long-lasting, and resistant to corrosion, abrasion, and other types of wear and tear. They are designed to withstand even the most challenging environments, ensuring that they perform reliably and efficiently under any conditions.

INDUSTRIES WE CATER

We offer products that have extensive applications across multiple industries. Our products are accepted by every major player across all industries.

Established In 1968, CAM Valves was founded by Angelo Brignoli and Pietro Brignoli in 1968, CAM S.P.A. is a family owned and operated group, which has been working in the series machining of medium and high precision range mechanical components for the automotive industry by metal-taking-off machines. In 2015 the young generation of the Brignoli family decided to bring their experience in the Oil and Gas business, taking on people with a huge knowledge and experience in design and manufacturing of valves. With the support of the new valve team, their aim are short lead times, exemplary quality and good customer service. Their modern manufacturing processes enables them to produce a wide range of products from both bar materials and forgings. CAM valves are made to order, in large or small quantities, depending on the customer's wishes.

A Control Seal Brand

CSeal International, a Control Seal brand is a leading control valve manufacturer, with its facility in North Netherlands, spread across 76,072 sqm, connecting Eemsdelta region into the world. For over three decades, Control Seal has been involved in manufacturing tailor-made, high-integrity valves for all critical applications.

CSeal International, is expertly run by a board of directors with decades of experience in the control valve manufacturing industry. We are committed to delivering high-quality valves to clients across the oil and gas, pharma and water and wastewater treatment industries at highly competitive prices.

Excellence Since 1953

Trusted Instrumentation Partner Since 1953, Winters Instruments have been manufacturing quality built instrumentation for all markets that require pressure and temperature measurement. Through the years, the company has grown in size and reputation and is now a leading, global manufacturer of instrumentations. Their comprehensive product lines of pressure gauges, pressure transmitters, pressure switches, diaphragm seals, thermometers, temperature sensors, valves, and various accessories are brought to market by an extensive network of distribution partners and are trusted by some of the world's most recognized fortune 500 companies.
